

AI IN OUR DESIGN WORK

Heavy Lifting, *Human Touch*

*A short story about letting AI into
our design process — what it gave
us, and what stayed ours.*

PRESENTED BY

Vishal Kamble

Design Team Lead

— A SHORT STORY · AI IN OUR DESIGN WORK

UX / DESIGN

We let AI into our process.
Here's *what it gave us* —
and *what it couldn't*.

FROM EVERYDAY TOOL → TO WHERE ONLY WE CAN GO

ACT 1 — TODAY · FIGMA → CLAUDE CODE

It works well —
because *we set the rules first.*

Rules first

Figma + MCP

Clear prompt

AI builds it

It doesn't just draw screens. It hands devs the whole kit.

01

Assets

Exported, ready to use.

02

Style guide

Colours, type, spacing.

03

Components

Reusable, consistent.

04

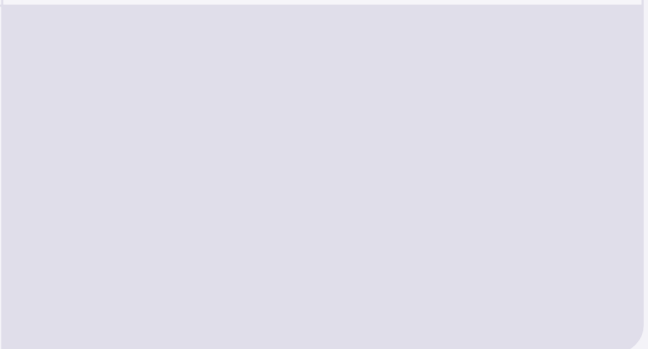

Developer handoff

Sizes, states, behaviour.

05

Clickable build

Working HTML / React.

Skills give us a ***solid starting direction*** — fast.

01

Research synthesis

Notes into patterns.

[ux-research-synthesis](#)

02

Competitor patterns

How others solve it.

[competitive-pattern-analysis](#)

03

Screens & structure

Mapped early.

[user-flow-ia-mapper](#)

04

Quick quality check

A first pass for issues.

[usability-heuristic-reviewer](#)

But ask it to design? Same safe layout, every time.

AI ON ITS OWN

ACTUAL AI OUTPUT

HOW IT WORKS

AI Without Operational Risk.

AI fails in predictable ways — **not magic**. Every workflow we build has governance, approvals, and rollback **built in**.

The same safe shape, every time.

A DESIGNER

✓ INTENTIONAL

— MADE ON PURPOSE

Creativity is a *choice*.

CLEAR BOLD ON PURPOSE

One bold idea, on purpose.

— ACT 3 — THE TURN · WHY IT HAPPENS

Not a prompt problem. Just how AI works.

It picks the *safe middle*. The bold ideas sit at the *edges*.

ACT 3 — THE TURN · WHEN HANDS WIN

When the idea is *specific*,
building it beats describing it.

× PROMPTING THE AI

Describing the feeling, over and over. Slow.

✓ DOING IT BY HAND

Already in your head. Faster, and yours.

ACT 3 — THE TURN · WHERE IT CAN'T HELP

HAND IT BACK TO US

Some parts *stay with us.*

01 Logo design

Great ideas — but no real vector file. We rebuild it.

02 A clear idea in your head

Faster to build than to explain.

AI does the *heavy lifting*. The *feeling* is still ours.

01

We bring the vision

Taste, emotion, judgment.

02

AI carries the load

Research, structure, build.

03

The work feels human

Because a person decided.
